

Monsoon Express

The affordable and effective solution for small sellers.

Monsoon Express includes the standard Monsoon features for Inventory Management, Order Management, Automated Pricing, Reporting and Integration. As your business grows, it is easy to migrate to other Monsoon software products with additional functionality.

Inventory Management

Efficiently receive, import, view, edit, classify and designate shelf/stock locations for inventory.

Standard Data Entry/ Inventory Receiving

- UPC/ISBN/ASIN data entry search/
Barcode scanning
- Rapid retrieval of inventory data, including real-time pricing
- Keyword search for non-standard items
- Create new products if inventory data is unavailable
- Browse multiple pages of search results
- Edit item attributes before accepting in to inventory
- Create multiple product categories

- Add notes for each classification to post with your listings

Standard Inventory Management:

- Manage listings across multiple marketplaces
- Look up items by ISBN, UPC, ASIN and keyword
- Browse and sort inventory view
- Edit multiple items
- Manage images for listings on eBay
- Configure shipping policies

Order Management

Import, view, sort, print and ship or cancel orders from multiple online markets — all from a single screen and with just a few clicks.

Standard Order Management

- Automated import of orders from Amazon.com, Half.com, eBay, eBay Stores, eBay Express, ABE (Books Only), and Alibris
- Automated decrement of sold items from all supported markets

- Browse and sort orders by parameters
- Manage and fill or cancel out-of-stock orders or partially-filled orders
- Print and ship orders in bulk by multiple parameters
- Print postage from Monsoon using Endicia online postage
- Automatically send emails to customers confirming shipment, partial fulfillment or cancellation of orders
- Lookup orders and edit by buyer name, email address, market order id, seller order number, or item title
- Add notes to orders
- Automated eBay Feedback submission

Automated Pricing

Automatically price your inventory according to the current market. This tool updates your prices on a schedule based on the number of items in your inventory.

Standard Pricing

- Up to 5,000 items per hour re-pricing speed
- Price inventory according to configurable criteria, including Product Category, Condition, Classification, Market Price, Inventory Age, Sales Rank and Vendor.
- Automatically re-price inventory at a configurable frequency
- Ignore specified competitors, by nickname or by feedback rating
- Set a 'price floor' for inventory to ensure that cost of goods are covered
- Set a default price in case market or

competitor information is unavailable

- Price at an average of the configurable number of the lowest competitors

Reporting Tools

Get a pulse check on your business with Monsoon's intuitive and easy-to-use reporting tools. Make informed business decisions with a solid understanding of:

- Number of inventory items in stock (Daily, Weekly, Monthly, Date Range)
- Number of unique SKUs in stock
- Number of orders by market (Daily, Weekly, Monthly, Date Range)
- Order amount by market (Daily, Weekly, Monthly, Date Range)
- Average sales price by market and total, over time
- Refund/Cancellation rate by market and total, over time

Integration

Exchange data with other tools you may already use to manage your business such as accounting or website software.

- Automated inventory import
- Manual inventory and order data export
